### 1.1 Caratteristiche generali

La serie T fornisce un'alternativa alla centrale di trattamento nella gamma di portate da 3000 a 20000 m<sup>3</sup>/h quando sia richiesto unicamente un trattamento di filtrazione, raffreddamento e/ o riscaldamento in ambienti civili o industriali.

Le unità serie T sono installabili in versione canalizzata e non. Sono disponibili vari accessori in mandata ed in ripresa. In questo catalogo non sono rappresentate tutte le possibili opzioni ed accessori previsti; per una più esaustiva trattazione riferirsi al catalogo completo.

Le unità possono essere installate sia verticalmente che orizzontalmente con possibilità di effettuare mandata ed aspirazione in più direzioni.

**Le unità disponibili a magazzino sono assemblate per installazione verticale con mandata verso l'alto, aspirazione frontale e lato attacchi ed estrazione filtri sinistro come raffigurato nella figura a lato.**

Eventuali modifiche del lato attacchi, della posizione delle bocche e della disposizione (da verticale ad orizzontale) sono facilmente eseguibili a cura dell'installatore.

### 1.1 General characteristics

*The T series is the viable alternative to air handling units in the 3000 - 20000 m<sup>3</sup>/h capacity range, when filtering, cooling and/or heating applications only are required in civilian or industrial installations.*

*T series units can be integrated into a ducting system, and can be fitted with a various types of delivery and return accessories. In the present catalogue some options and accessories are not shown; for a more detailed description refer to the complete catalogue.*

*Units can be installed horizontally or vertically, with air delivery and intake in several directions.*

***The units available at stock are suitable for vertical installation, upstream supply, front intake and left side coil headers and filter withdrawal, as shown in the picture.***

*Changes in the layout for horizontal installation and/or position of supply and air intakes and headers side can be easily executed by the installer.*

(2) Intake air  $t_{db}$  20°C Water 7-12°C

Water 70-60°C

## 2. Sigle identificative

## 2. Identification

### Unità Base

L'unità viene univocamente definita, nell'orientamento standard (vedi § 11) dalla sigla tipo Txx descritta di seguito.

### Basic unit

The unit, for the standard orientation (see § 11), is clearly defined by an identification code Txx as follows:

| T |   | unità di trattamento aria serie T                   | T series                              |
|---|---|-----------------------------------------------------|---------------------------------------|
| X | 1 | grandezza 1                                         | size 1                                |
|   | 2 | grandezza 2                                         | size 2                                |
|   | 3 | grandezza 3                                         | size 3                                |
|   | 4 | grandezza 4                                         | size 4                                |
|   | 5 | grandezza 5                                         | size 5                                |
|   | 6 | grandezza 6                                         | size 6                                |
|   | 7 | grandezza 7                                         | size 7                                |
| X | 6 | sezione di trattamento aria con batteria a 6 ranghi | Air handling section with 6 rows coil |
|   | 4 | sezione di trattamento aria con batteria a 4 ranghi | Air handling section with 4 rows coil |

**Esempio:** una unità T della grandezza 3, composta di sezione di trattamento aria con batteria a 4 ranghi viene identificata dalla sigla **T34** dove:

T ----> Unità serie T  
3 ----> Grandezza 3  
4 ----> Batteria a 4 ranghi

**Example:** a T series unit 3rd size, comprising air handling section with 4 row coil, is identified by the code **T34**, where:

T ----> T series unit  
3 ----> Size 3  
4 ----> Conditioning section with 4 row coil

### Accessori

Gli accessori, forniti separatamente con montaggio a cura del cliente, vengono identificati con le sigle seguenti.

### Accessories

The accessories, supplied separately to be assembled to the basic unit by client, are identified with the following codes.

|                         |                   | T    |      |      |      |      |      |      |
|-------------------------|-------------------|------|------|------|------|------|------|------|
| Accessorio              | Accessory         | 1    | 2    | 3    | 4    | 5    | 6    | 7    |
| Griglia di ripresa      | Intake louvre     | T1GC | T2GC | T3GC | T4GC | T5GC | T6GC | T7GC |
| Plenum di mandata       | Supply plenum     | T1M  | T2M  | T3M  | T4M  | T5M  | T6M  | T7M  |
| Kit piedini di appoggio | Mounting feet kit | T1P  | T1P  | T1P  | T1P  | T1P  | T6P  | T7P  |

### 3. Portate

Le portate sono rappresentate nel diagramma seguente, espresse in m<sup>3</sup>/h e corrispondenti alle velocità frontali sulla batteria di 2 - 2.5 - 3 m/s.

### 3. Capacities

Units capacity values are given in the diagram below, and are expressed in m<sup>3</sup>/h corresponding to frontal speed on coil with 2 - 2.5 - 3 m/s.

Nota: la velocità frontale massima per il funzionamento in raffreddamento è prevista in 2.6 m/s.

N.B. The maximum face velocity for cooling applications is 2.6 m/s.

### 4. Involucro

L'involucro è del tipo a telaio portante e pannelli di tamponamento.

I pannelli sono di tipo sandwich realizzati come segue:

- parete esterna: lamiera zincata preplastificata di colore azzurro polvere chiaro;
- parete interna: lamiera zincata;
- isolamento: poliuretano iniettato;
- spessore totale pannelli: mm 25;
- isolamento fonoassorbente interno per plenum di mandata/ripresa.

Il telaio è in lega d'alluminio (finitura alluminio naturale) con giunzioni d'angolo in nylon nero.

I pannelli sono fissati al telaio mediante viti autoforanti con rosette nichelate.

### 4. Enclosure

The unit enclosure comprises a frame with insulating panels.

The sandwich type panels are composed as follows:

- outer wall: plastic coated galvanised sheet metal, powder blue colour;
- internal wall: galvanised sheet metal;
- insulation: polyurethane foam;
- total panel thickness: 25 mm;
- delivery plenum with sound absorbent lining.

The aluminium alloy frame (with natural aluminium finish) features black nylon corner joints.

Panels are fixed to the frame by means of self-tapping screws with nickel washers.

## 5. Ventilatori e motori

Ventilatori: i ventilatori sono del tipo centrifugo a doppia aspirazione e pale in avanti.

Le grandezze 6 e 7 montano i ventilatori in esecuzione binata.

Motori: motori sono normalizzati UNELMEC (grado di protezione IP55 e classe d'isolamento F), alimentazione trifase 220/380.

Trasmissioni: con pulegge tipo Taper-Lock fisse sul ventilatore e variabili sul motore e cinghie SPZ o SPA a seconda della grandezza dell'unità.

Supporti antivibranti: sono previsti ammortizzatori in elastomero sotto la culla motore-ventilatore e sul lato superiore del motore. La bocca del ventilatore realizza la tenuta rispetto al pannello tramite un'apposita guarnizione elastica.

## 6. Filtri

Sono previsti filtri sintetici ondulati classe G3

I filtri sono alloggiati su guide presenti nella sezione di contenimento batteria di raffreddamento

L'estrazione dei filtri avviene sfilandoli lateralmente attraverso lo sportellino previsto sul pannello lato attacchi utilizzando l'apposito utensile fornito a corredo.

## 7. Batterie di scambio termico

Esecuzione: Rame-alluminio

Ranghi: 4 o 6 ranghi.

Funzionamento: acqua

Estraibilità: Laterale

Vasche condensa: in peraluman con scarico laterale.

## 8. Accessori

### **TxGC Griglia di ripresa per sezione di raffreddamento**

In alluminio anodizzato a semplice filare di alette fisse; viene montata sull'apertura di aspirazione delle sezioni di raffreddamento e risulta incassata nel telaio di alluminio dell'unità.

### **TxM Plenum di mandata**

Realizzato con la stessa pannellatura dell'unità base ma con l'aggiunta di in materassino fonoassorbente interno, trova impiego in installazioni non canalizzate della unità T per l'immissione dell'aria in ambiente attraverso una bocchetta a doppio filare di alette singolarmente orientabili. La bocchetta è realizzata in alluminio anodizzato.

### **T1P-T6P Kit di piedini**

In lamiera zincata aumentano l'altezza dell'unità di mm 50.

## 5. Fans and motors

### Fans

*Centrifugal twin-intake fans with forward curved blades. Sizes 6 and 7 are equipped with twin fans.*

### Motors

*Motors are UNELMEC standard (protection category IP 55, insulation class F).*

### Transmissions

*Fixed (on fan) and variable (on motor) Taper-Lock pulley and vee belts type SPZ or SPA (depending on unit size).*

### Anti-vibration mounts

*Elastomer anti-vibration mounts beneath motor-fan cradle and on upper side of fan. Fan outlet makes seal with the panel by means of an elastic gasket.*

## 6. Filters

*Units are fitted with class G3 corrugated synthetic filters.*

*The filters are mounted on guides in the cooling coil section. Filters are removed by sliding them laterally through the opening on the connection side panel by means of the tool supplied.*

## 7. Coils

Type: Copper-Aluminium

Rows: 4 or 6

Operation: with water

Slide-out: from side

Drip tray: in peraluman with side connection

## 8. Accessories

### **TxGC Return air panel cooling section**

*Made from anodised aluminium with single row of fixed blades; fitted to the intake port on cooling sections, flush to the unit aluminium frame.*

### **TxM Delivery plenum**

*Made from same panelling as the standard unit, but also features internal sound-absorbing lining. Used in non-ducted versions of the T unit, for air flow through a port with twin rows of moving blades. The port is made from anodised aluminium.*

### **T1P-T6P Feet kit**

*Galvanised sheet metal feet (50 mm).*

## 9. Limiti di funzionamento

- Dp max lato acqua batterie ==> 50 kPa
- Velocità frontale massima per batterie ad esclusivo impiego in riscaldamento ==> 3.2 m/s
- Velocità frontale massima per batterie in raffreddamento = = > 2.6 m/s (corrispondente alla portata d'aria nominale)
- Minima temperatura in aspirazione ==> -20°C
- Massima temperatura in aspirazione ==> +40°C
- Perdita di carico finale dei filtri: ==> 150 Pa
- Perdita di carico massima lato acqua ==> 50 kPa

## 9. Operating limits

- Max. front speed for heating only coils ==> 3.2 m/s
- Max. front speed for cooling coils ==> 2.6 m/s (equal to nominal air capacity)
- Min. intake air temperature ==> -20°C
- Max. intake air temperature ==> +40°C
- Filter final load loss ==> 150 Pa
- Max. load loss coil water side ==> 50 kPa

## 11. Orientamenti

Le sezioni ventilante e batteria di raffreddamento sono realizzate in modo da poter essere orientate cambiando la posizione del pannello di aspirazione e della parete di passaggio aria fra le due sezioni. Le batterie possono essere capovolte in modo da presentare gli attacchi sul lato destro o sinistro indifferentemente.

Le macchine possono essere montate con sviluppo verticale od orizzontale.

Le unità vengono fornite da magazzino con l'orientamento illustrato di seguito per le unità base.

Sono raffigurate anche le unità con griglia di aspirazione e con plenum di mandata e griglia di aspirazione.

Per consegne da magazzino la griglia ed il plenum di mandata vengono fornite come colli a parte da assemblare alla unità base a cura del cliente.

## 11. Orientations

*The fan and cooling sections of the unit have been designed to allow selection of orientation by simply switching the position of the intake panel and the air passage partition between the two sections. The coils may be turned for connection on left or right side, as desired.*

*The units can be installed with both vertical and horizontal layout.*

*The units from stock are supplied in vertical form as shown below.*

*The configurations with intake louver and supply plenum with intake louver are shown too.*

*For deliveries from stock the intake louvers and the supply plenums are supplied separately to be assembled to the basic unit on site by the client.*

## 12.1 Portate e pressione utile per unità canalizzate

Nei grafici che seguono sono indicate, portata e la pressione utile esterna, fornita dal ventilatore, alla massima (linea continua) ed alla minima (linea tratteggiata) velocità di rotazione, consentite dalla puleggia variabile.

I dati variano a seconda dei componenti elencati:

- C** filtro + batteria di scambio termico 4 ranghi  
**D** filtro + batteria di scambio termico 6 ranghi

## 12.1 Air flows and external static pressure for ducted units

The graphs below show the external static pressure supplied by the fan at max. (continuous line) and min. (dashed line) speed permitted by the variable pulley, according to capacity.

Data vary according to the components:

- C** : filter + 4 row heat exchange coil  
**D** : filter + 6 row heat exchange coil

## 12.2 Portate per unità non canalizzate

La tabella seguente indica la portata d'aria minima e massima ottenibile nella configurazione con plenum di mandata e griglia di ripresa.

I dati variano a seconda dei componenti elencati:

**Tx4** filtro + batteria di scambio termico 4 ranghi  
**Tx6** filtro + batteria di scambio termico 6 ranghi

## 12.2 Air flows for non-ducted units

The table indicates the air flows in the non-ducted layout (with supply plenum and intake louver).

Data vary according to the components:

**Tx4** : filter + 4 row heat exchange coil  
**Tx6** : filter + 6 row heat exchange coil

| Portata aria / Air flow |                 |        |       |       |

## 13 LIVELLI SONORI

Sono riportati i valori della rumorosità alla bocca del ventilatore al variare della velocità di rotazione della girante e della portata.

## 13 NOISE DATA

On this diagram the noise levels at fan mouth. The noise levels are a function of fan's speed and air flow.
